

### DUST COLLECTION EQUIPMENT

**Applied on Dust and Fumes from Welding, Metal Working, Pharmaceutical, Chemical, Food, Bulk Mixing or similar.**

**6 Cartridge Module with fume/dust capture arms (10' long at 8" dia.)**

To the right is a Standard 7.5 hp. 6 cartridge Module with arm option to the open face. Cannot use both methods at the same time. Module is equipped with a stack of plates that will seal up the front and force the captured dust/fumes through the arms OR the arms have dampers that can close and the unit converts to a standard open face Environmental Work Station.

Below illustrates the 8 cartridge 10 hp. Unit with 12" or 14" inlets for ductwork applications.

- Ultra High Efficiency Dry Collector Cartridges (99.97%) eliminate all fumes and dusts that are pulled through the cartridges.

\*\*\*\*\*

- Fume Capture Arms offer the "point capture" that OSHA would like to see on most applications if possible).

\*\*\*\*\*

- The Module is Automatic Self Cleaning with the use of a small amount of compressed air that is PULSED down inside the cartridges to pulse the dust off down into the receiving cart and boxes below. Then disposal of dust is easy.

**MANUFACTURED IN THE U.S. WITH AMERICAN COMPONENTS.**
